Submit your next Drug Discovery Paper to...

The Journal of Pharmacology
And Experimental Therapeutics

the “Go-To” journal for publishing state-of-the-art research in Drug Discovery

Submit your Manuscript Online: submit-jpet.aspetjournals.org

Benefits of Publishing with JPET:

- **JPET** has had a long tradition of publishing the field’s key papers describing the discovery, characterization and development of new chemical probes and therapeutics.

- **JPET**’s section on Drug Discovery and Translational Medicine has grown to be among the top three sections in the journal with more than 130 papers published since 2010.

- Recent examples include papers describing novel pharmacological tools and clinical candidates for multiple therapeutic areas including: oncology, metabolics, cardiology, psychiatry and neurology.

- **JPET** Editorial Board members have extensive expertise in drug discovery research and can provide authors an enhanced level of consistent and timely feedback on manuscripts covering this important area.

- **JPET** MiniReviews – Brief (4000-6000 word) reviews/commentaries of topical areas of interest for the journal readership. All aspects of pharmacological and drug discovery research are welcome.

- Free submission for ASPET members.

Quantitative Systems Pharmacology (QSP)

**Call for Papers**

JPET is launching a new initiative to highlight innovative research that integrates advances in pharmacology, systems biology and PK/PD modeling to improve understanding of drug mechanisms, sites of action, disposition and metabolism and leverage this information to enhance drug discovery and translational medicine. Papers describing new drug targets, mechanisms, biomarkers, failure analysis and other enabling technologies that support this emerging discipline in biomedical research are welcome.
